- ▶ Customizable User Interface
- ▶ Automatic Software Updates
- ▶ SSL 40 & 128 bit
- ▶ Auto Disconnect
- ▶ Easy Installation and Setup Procedure
- ▶ Full Screen Mode
- ▶ Online Help
- ▶ Includes Embedix Linux OS

## *Embedix Browser Provides Internet Connectivity*

### **Hand-held Devices with Display**

Put the Internet in the palm of your customer's hand—literally! Embedix Browser provides hand-helds with full Web access, while minimizing system requirements.

### **Set-top Box**

Demand for Internet access through televisions is growing, and Embedix Browser provides the ideal solution: a customizable browser that can be pre-configured for dial-up access to virtually any ISP. All the end user must do is plug in and browse, beginning with the home page you designate.

**INTERNET**

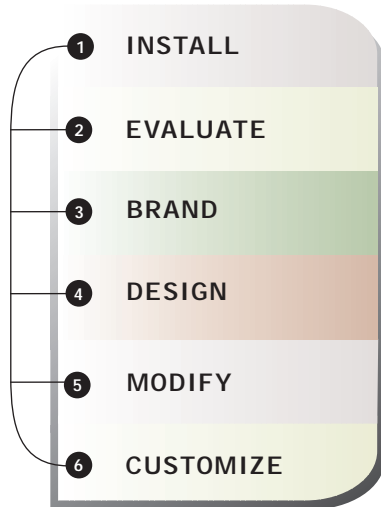

### **Kiosk/Point of Sale Terminals**

Kiosks have generally been expensive to implement, but Embedix Browser provides a low-cost solution. Full-screen Web pages, new or existing, can be viewed on fully functional kiosk terminals in locations such as store fronts, theaters or banks.

## Overview of Embedix Browser Customization

Install Embedix Browser software on your hardware.

Determine the level of customization you require.

Brand the user interface by replacing graphics and updating text.

Design screen layout and choose colors, fonts, etc. according to preference.

Modify configurations as needed.

Adapt the User Guide and Online Help to reflect your customization.

### Recommended System Requirements

#### ► Hardware

Display, such as a touchscreen monitor or television

Real Modem or LAN

Pentium\* 133+ class processor

16 MB RAM

8 MB Flash memory

128 K Flash EPROM

Input Device, such as keyboard or touch screen

#### ► Internet Access

Access through an Internet Service Provider (ISP).

The ISP will provide you with all the information that you need, in conjunction with the User Guide, to set up Embedix Browser for Internet access.
